Product Description

Monochrome LCD Display 12:00 Viewing Direction FSTN/TN Positive Widescreen

Product Description:

The Monochrome LCD Display provides great visibility and clarity in a low power consumption format. This display is designed with a 4.8V operating voltage and a TN/Positive display type, giving it a viewing direction of 12 o'clock. The FPC connector allows for easy integration and the module size of 190*32.9*9.7mm offers a compact space-saving solution. This mono lcd display module is perfect for a variety of applications where low power consumption and clarity are desired.

Features:

Product Name: Monochrome LCD Display

Operating Temperature: -20 To +70

Display Color: Red & Blue & Green & White ...

Operating Voltage: 4.8V

Display Type: TN/Positive

Response Time: 16 Ms

Tn Monochrome Display: Yes

LCD Display Module: Yes

Technical Parameters:

Property	Value
Module Size	190*32.9*9.7 Mm
Operating Voltage	4.8V
Viewing Direction	12 O'clock
FPC Pin Number	50 Pins
Connector	FPC
Operating Temperature	-20 To +70
Display Type	TN/Positive
Polarzer Mode	Transflective
Display Color	Red & Blue & Green & White ...
LCD Size	188*27.5 Mm

Applications:

Monochrome LCD Display, produced by Chenghao Optoelectronic and having model number CH32X4T01F, is a reliable and cost-effective choice for various applications. It has been certified CE, RoHS, and FCC, with a minimum order quantity of 1 pcs. The product is well packed in a safe way, with tray and carton for small sizes, and foam slot and carton for bigger ones. Customers can also customize the package according to their needs. It has a response time of 16 ms, viewing area of 185*23 mm, and FPC pin number of 50 pins. With a supply ability of 5000K pcs/month, it can be delivered within 3~5 working days upon payment via TT or negotiation. The operating temperature and voltage ranges from -20 to +70 and 4.8V respectively.
